

MANUFACTURING AND DISTRIBUTION FACILITY GEORGIA PACIFIC

CLIENT

GEORGIA PACIFIC

LOCATION

TOLUCA, MEXICO

ROLE

CONSTRUCTION MANAGEMENT

PROJECT

360,000 SQ FT

Georgia-Pacific is an American paper and building products company with facilities in North America, South America and Europe.

ECM has a long history of working with owners and developers as firms build manufacturing and distribution facilities in Mexico. Georgia Pacific teamed with ECM (as Project Manager) and Vesta (as developer) to construct a new 360,000 sf. manufacturing and distribution center on a 48-acre site near Toluca, México.

ECM became involved early in the building process and was responsible for project development, creation of specs, preparation of bid documents, general contractor selection, consultation and all aspects of construction management. The fast-track, tilt-up building was completed in only six months.

A seasoned outlook and proactive approach makes ECM a valuable asset to any project team.
