

## STORMWATER IMPROVEMENTS PROGRAM CITY OF EL PASO

### CLIENT

CITY OF EL PASO

### LOCATION

EL PASO, TEXAS

### ROLE

CONSTRUCTION MANAGEMENT

### PROJECT

STORMWATER IMPROVEMENTS  
\$16 MILLION

The City of El Paso experienced dangerous and destructive mountain run-off and flooding caused by the 2006 storms. ECM was hired as construction manager to oversee seven concurrent projects across the metro area.

While the project concept was fairly straightforward, the coordination effort between multiple stakeholders in private organizations and multiple city, state and federal agencies was quite complex. These included the International Boundary and Water Commission, Customs and Border Protection, El Paso County Water Improvement District No. 1, and BNSF Railway Company.

Like many municipalities, the City of El Paso consistently utilizes ECM as a resource to handle their extensive list of critical projects.
