

## MEDICAL, HEALTH, & DENTAL CLINICS FORT BLISS & WHITE SANDS MISSILE RANGE

### CLIENT

U.S. GOVERNMENT

### LOCATION

FT. BLISS, TEXAS  
WHITE SANDS MISSILE RANGE, NEW MEXICO

### ROLE

PROJECT & CONSTRUCTION MANAGEMENT

### PROJECT

\$87 MILLION  
235,000 TSF

ECM's Federal Government experience includes one of the largest programs ever done for the Military; the expansion of Fort Bliss Army Base from 2007 to 2011.

As part of the Land Development Engineering (LDE) Contractor Team for the Fort Bliss Transformation Program, ECM provided project and construction management services to the US Army Corps of Engineers for the construction of four medical and dental clinics at Fort Bliss, Texas, and White Sands Missile Range in New Mexico.

At Fort Bliss, ECM managed three facilities; a Consolidated Family Care/Troop Medical Clinic, a IBCT Health and Dental Clinic and a Dental Clinic. While at White Sands Missile Range in New Mexico a Health and Dental clinic was introduced. All were fast-track design-build projects designed and built to achieve LEED Silver Certification.

These full-service facilities included offices, dental and examination rooms, x-ray suites, sterilization rooms, prosthetics laboratory, and pharmacies.
