

AEROSPACE INDUSTRIAL PARK BOMBARDIER

CLIENT

BOMBARDIER
VESTA

LOCATION

QUERETARO, MEXICO

ROLE

PROJECT & CONSTRUCTION MANAGEMENT

PROJECT

\$ 16 MILLION
200 ACRE PARK

Bombardier is a global supplier of transportation products ranging from business and commercial aircraft to transit and high speed trains.

ECM was contracted to manage the construction of a state-of-the-art manufacturing facility for Bombardier Aerospace in their new 200-acre high-tech manufacturing park in Queretaro, Mexico. This aerospace complex will support both Bombardier and its key suppliers.

The ECM crew worked closely with Bombardiers' Canadian and international technical teams to create an overall vision for the plant. Our services ranged from bid packages prep and bid evaluations to creation of project scope, schedules and budgets. We handled all aspects of construction oversight and project management.

ECM has continued the relationship with Bombardier and has completed multiple projects across the region.
