

# MALLINCKRODT PRODUCTION BASE MALLINCKRODT PHARMACEUTICALS

## CLIENT

MALLINCKRODT PHARMACEUTICALS

## LOCATION

CIUDAD JUAREZ, MEXICO

## ROLE

CONSTRUCTION MANAGEMENT

## PROJECT

132,000 SQ FT

Mallinckrodt Pharmaceuticals is a 170+ year old company that develops and manufactures specialty pharmaceutical products worldwide. ECM International has decades of experience with assisting global firms establish new facilities in Mexico.

Mallinckrodt selected ECM as project managers for their new high-tech manufacturing plant in Ciudad Juarez. ECM was heavily involved from the definition and development of the concept thru construction and commissioning of the project. The 132,000 sq ft facility includes proprietary pharmaceutical processes and approximately 12,000 sq. ft. of office space, meeting rooms and conference facilities.

ECM's unique relationships and knowledge of local construction processes allowed the client maximum flexibility to make numerous tenant improvement changes to the project – while under construction - without negatively impacting schedule and budget.

This successful project led to another facility. ECM is happy to have Mallinckrodt as a repeat customer.
