

MULTI-USE COMPLEX & AQUATIC CENTER CITY OF ALICE

CLIENT

CITY OF ALICE

LOCATION

ALICE, TEXAS

ROLE

PROJECT MANAGEMENT

PROJECT

30,000 SQFT
\$ 21 MILLION

ECM International was retained to provide project management and audit services as well as cost assessment for design and construction related to the multi-use complex and aquatic center.

The aquatic center & natatorium features administrative space, outdoor leisure pool and prospective outdoor amphitheater. The indoor pool is referred to as a “twenty-five-yard stretch pool”, with a diving well and a movable bulkhead. Indoor seating will consist of a movable bleacher system designed to accommodate 800 people.

The outdoor leisure pool will include interactive water features, zero depth entry areas, water slides, deck space, shade structures and a “lazy river” water feature.

The future outdoor amphitheater will have a covered pavilion/stage and seating for approximately 2,500 spectators.

ECM provided timely and crucial information for the City Council and all stakeholders.
