

STANDARD SPECIFICATIONS FOR STORMWATER DEPT EL PASO WATER

CLIENT

EL PASO WATER

LOCATION

EL PASO, TEXAS

ROLE

PROJECT MANAGEMENT

El Paso Water (formerly EPWU) is the agency responsible to manage all aspects of water, wastewater and stormwater for the City of El Paso (COEP).

To manage the changing needs of a growing city, EPWU determined that an update of the codes and specifications for the handling of stormwater would be required. With deep knowledge based on numerous projects a long and successful track record, ECM was hired to create the new stormwater specs. ECM utilized experience with the local market, coupled with an understanding of local, national and international guidelines to build a set of technical guidelines that are clear, forward looking and functional.

ECM offers a large staff of professional from multiple disciplines to solve a wide range of needs for city and county leaders as they build their communities.
