ROLE

PROJECT MANAGEMENT

El Paso Electric Company (EPEC) is a public utility company engaged in the generation, transmission, and distribution of electricity in west Texas and southern New Mexico. EPEC serves an expanding client base of over 400,000 residential, commercial, industrial, and wholesale customers.

El Paso Electric Company is actively involved in a program to enhance and upgrade their capabilities and has contracted ECM International to serve as Project Manager for the construction of a new electric substation to accommodate their growing demand in the northwest section of its service area.

ECM has the diverse knowledge to complete complicated utility projects ranging from substation construction to infrastructure coordination.
